NABCO
NATIONAL ALLIANCE OF BREAST CANCER ORGANIZATIONS

Most colon cancers start as benign polyps that can be removed with a simple procedure. This is one cancer we can stop before it starts. If you are age 50 + please follow the American Cancer Society's guidelines for early detection.

Fecal occult blood test (FOBT) every year and flexible sigmoidoscopy every 5 years
OR
Colonoscopy every 10 years
OR
Flexible sigmoidoscopy every 5 years
OR
Double contrast barium enema every 5 years
OR
Fecal occult blood test (FOBT) every year

*Please Note: these guidelines are for people without symptoms, personal history. Your physician may wish to check you more frequently.

NATIONAL OSTEOPOROSIS FOUNDATION

Developing a stabilizing climate that unites the bone and non-bone individuals of their face symbol was inspired by the National Osteoporosis Foundation to create the gold ribbon. The gold color represents the bone, while the face symbolizes the complex, intricate, and delicate structure of the bone. If we could see the complex composition of the bone, we would probably think it is beautiful. Research and education are absolutely critical to the fight against the disease. By wearing this ribbon, you're saying that together, we can stand up to osteoporosis.
